CATALOGUE

OF THE

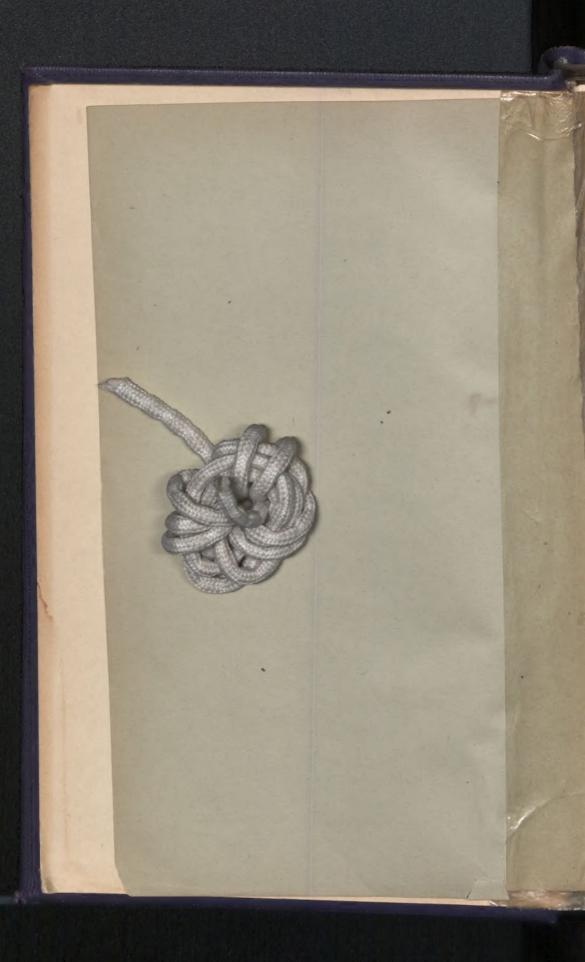

OFFICERS AND STUDENTS

OF

THE COLUMBIAN UNIVERSITY,

FOR THE ACADEMIC YEAR, 1876-'77.

WASHINGTON:
GIBSON BROTHERS, PRINTERS.
1877.

NOTE.

By an act of Congress approved March 3, 1873, the act to incorporate the Columbian College, in the District of Columbia, approved February 9, 1821, was so far modified as to provide, *inter alia*, "that said Corporation shall be hereafter known and called by the name of the Columbian University, and in that name shall take, hold, and manage all the estate and property now belonging to said College, or that may hereafter be conveyed, devised, or bequeathed to said Corporation by its original name."

THE LAW SCHOOL

The Law School of the Columbian University is held in the Law Building, situated on Judiciary Square, Fifth street, between D and E streets.

ADMISSION.

The course of study is adapted to graduates of colleges, and to any who have attained a sufficient discipline of their mental powers. All, however, who desire, are admitted to the recitations and lectures of the School, it being understood that their graduation will depend on their success in mastering the daily exercises and in passing the final examinations. No one is admitted as a caudi date for graduation in the Senior Class who has not spent one year either at this or some other Law School, or performed a corresponding amount of study under some approved attorney

SESSIONS.

The entire course of study embraces two years. The annual session begins on the second Wednesday in October and ends on the second Wednesday in June. The exercises of the School are all held after the usual office hours, which close at 3 o'clock, thus giving to students the entire day for study, for reading in the public libraries, and for attending the several courts of the Capital, and at the same time enabling young men engaged in office duties to avail themselves of the facilities of the School.

COURSE OF INSTRUCTION.

The School is divided into two classes, a Junior and a Senior.

Junior Class.

PROF. COX.

The instructor of the Junior Class, aiming to secure for his pupils as thorough and accurate a knowledge of the law of real and personal property, of contracts, and of crimes and mis demeanors, as it is possible for them to attain within the brief

period of a scholastic year, places in their hands successively, Blackstone's Commentaries, Kent's Commentaries, Parsons on Contracts, and Byles on Bills, as text books to be carefully read and studied by them. He meets the class on Tuesday, Thursday, and Saturday of each week. For each meeting a lesson of moderate length is assigned, and the lesson for the evening forms the subject of his lecture. In his lecture he reviews, illustrates, and simplifies, as far as he can, the teachings of the lesson; shows how far, and in what particulars, the law contained in it has been repealed or modified, either by English or American statutes, or by the American common law; notices, particularly, such English statutes as are in force in our own country as parts of the American common law; and tries to remove the doubts and uncertain ties that are apt to trouble and perplex those entering for the first time upon the study of the law. And to insure a careful reading of the lesson, and proper attention to his lecture, he, at the close of the latter, questions the class upon the important points of each; and, by his catechetical analysis, reproduces, and impresses upon the memories of his pupils, the teachings of both lesson and lecture.

The Senior Class.

PROF. TYLER.

The students of the Senior Class meet the Professor charged with their especial instruction on Monday, Wednesday, and Friday of each week, and while pursuing the special studies of the Senior course are required to attend the recitations and lectures of the Junior year, that they may be thoroughly grounded in the law of real and personal property and of contracts.

The special studies of the Senior year begin with Common Law Pleading, in which Stephen on Pleading, as edited by the Professor, (with an Introduction on the relations of the Common and of the Civil Law, and a Dissertation on parties to actions at law,) is used as the text-book of the class. Next follow instructions on the Law of Evidence, with Starkie on Evidence as a manual. To these succeed instructions in Equity Jurisprudence and Equity Pleading and Practice, Adams on Equity and Mitford and Tyler's Pleadings and Practice in Equity being the text books used under these heads. The closing part of the course is occupied with the Law of Partnership considered in itself, and in its relations.

tions to remedies afforded in Courts of Equity. And because of their special character, lectures are given on the remedies. Eject ment, Quo Warranto. Scire Facias. and Mandamus, as also lectures, by way of review, on Pleading and on Evidence, delivered at the close of the whole course

The method of instruction pursued in this class is as follows: A lesson comprising a certain number of pages in the text book is assigned to the class, and on the subject matter of this lesson the Professor at his next meeting lectures according to the requirements of the case. At the next meeting he examines the class on the text and lecture of the preceding meeting—using for this purpose carefully written questions, and calling up inclisernmentally the members of the class. In this way the students are trained to reproduce with readiness and accuracy the principles they have learned both from the text books and the Lectures of the Professor.

Extraordinary Lectures are delivered to the students of the School by George F. Appleby, Esq., on the technical details of Legal Practice.

MOOT COURTS.

A moot court, organized by the students under the conduct of one of the Professors, furnishes experience in the practice of the lawyer's professional duties. Associations composed of students of the School, formed for mutual improvement in the discussion of subjects connected with law studies, and for practice in forensic debate, are encouraged. The halls of the Law Building, warmed and lighted, are free for the use of such associations.

LIBRARIES.

The Library of the Law School will be furnished with import ant text-books, Reports, and other books of reference. The un equalled collection of the Congressional Library is open during seven hours of each day to all who wish to examine any authority. or to take notes from any book of reference, ancient or modern.

SPECIAL FACILITIES.

The city of Washington furnishes special facilities for the law student as well as for the general scholar. Besides the local courts. both criminal and of common pleas, the sessions of the Federal courts, both the Circuit and the Supreme Courts, are invaluable for practical instruction to students. In addition to these, the discussions on patent law, the deliberations of the Court of Claims, and the debates on constitutional and international law in the Halls of Congress, form a combination of facilities such as no other city affords to one desirous of general improvement.

EXAMINATION AND GRADUATION

All candidates for graduation are required to pass a general examination, at the end of their course, on all the studies of the two years, in the presence of the Faculty and of such committee as the Trustees of the University may appoint. This examination is conducted upon printed questions, which are answered by each student in writing.

The degree of Bachelor of Laws is granted to students who, having passed both years of the prescribed course in the School, or who, on presenting credentials of equivalent study in some law college or office, and passing one year in the School, shall sustain satisfactory examinations in all the studies of both the Junior and Senior classes.

The time spent in the Law School of the University is counted as part of the period of study required for admission to the bar of the Supreme Court of the District of Columbia; and it is understood that a diploma of the School, together with a certificate of regular attendance from the Professors, will secure such admission without examination.

PRIZES.

Three prizes, one of forty dollars, one of thirty dollars, and one of twenty dollars, are annually given to the respective authors of the best three essays among all those handed in by such members of the graduating class as shall compete for them. The prizes are awarded by the regular professors of the School.

COMMENCEMENT.

The degrees are publicly conferred, and the prizes publicly delivered, at the annual Commencement of the Law Department, when, in connection with other appropriate exercises, an address is delivered to the graduating class by an eminent member of the bar whom they may have selected for the purpose.

EXPENSES

The entire charge for tuition, lectures, use of library, and all facilities of the School, is eighty dollars for a single year, or one hundred and fifty dollars for two years, payable in advance half yearly, or in monthly instalments, at the option of students. Students desiring to devote three years or more to the prepara tion for graduation, giving special attention also to the subsidiary lectures of the course, may have this privilege by the payment of two hundred dollars for the entire course. Half year tickets of admission to recitations and lectures are issued on the second Wednesday in October and February, on payment of jury dol lars in advance. Half year tickets to attendants on lectures and other exercises of the School, who are not candidates for gradua tion or subjects of examination, are furnished at twenty dullars. invariably in advance. A charge of two dollars is made for diplo Students from abroad can procure board at prices as rea sonable as in any other city. Those who wish to do so can occupy rooms in the College building at a charge of jorty dollars per year for room rent.

Graduates of the School are admitted to all lectures of the un dergraduate course in subsequent years without charge

THE MEDICAL SCHOOL.

The commodious building in which this School holds its sessions was given to the University through the munificence of William W. Corcoran, LL. D., and is situated on H street, between Thirteenth and Fourteenth streets, in Washington.

The School is furnished with a museum containing a valuable collection, and is also provided with other appointments suitable for purposes of medical, anatomical, and surgical study.

The plan of instruction pursued in the school comprises a course of didactic lectures on the seven essential branches of medical science, viz: Anatomy, Physiology, Materia Medica, Chem istry, Surgery, Obstetries, and the Theory and Practice of Medicine, by which the student becomes versed in the principles of his profession: and, conjoined with this, ample opportunities will be afforded for bedside instruction, by which the general principles taught in the lecture-room can be verified, illustrated, and practically applied, under the immediate observation of the student. In this latter particular no pains will be spared to render him per fectly familiar with the various modes of examining patients, analyzing symptoms, and arriving at a correct diagnosis and prognosis of any case that may be presented. In like manner he will learn, from the hands of those ripe in experience, the art of prescribing medicines and of observing their effects, the mode of performing surgical operations, &c

CLINICAL INSTRUCTION.

The opportunities for clinical instruction in the city of Wash ington have of late years increased in proportion to its augmented population and growing business activity. Providence Hospital, Columbia Hospital for Women, the Children's Hospital, the Washington Asylum, and the Freedman's Hospital, together with the various Dispensaries in the city, present abundant facilities for the practical study of disease, while these institutions are so located that students from any part of the city may always have easy access to them by means of the street railroads, now running in almost every direction. Those members of the Faculty holding

hospital positions will give notice of their respective clinical programmes at the commencement of the session.

In connection with the College there is a free dispensary service, from 1 to 3 p m., daily. Students have the privilege of being present during these hours, and of witnessing the mode of examination and treatment of disease.

LIBRARIES, ARMY MEDICAL MUSEUM, &c.

The medical student has free access to the Libraries of Congress, of the Army Medical Museum, of the Smithsonian Institution, and of the Patent Office, all of which contain rare and costly works in every department of science and literature. The Army Medical Museum, situated on Tenth street, between E and F, is also open for inspection daily, from 9 to 3 o'clock. With its unrivalled collection of pathological specimens, illustrating the results of disease in every form, and an almost unlimited number of other preparations, showing the effects of gun-shot wounds and surgical injuries of every kind, this Museum presents a field for study equal, and perhaps superior, to that of any institution of the same kind either in this country or Europe.

As the College lectures begin at 5.30 in the evening, ample time is afforded during the term for visiting the public buildings and other places of interest. Prominent among these may be mentioned the Government Botanical Gardens and the grounds of the Agricultural Department, where the student of botany may find a rare collection of medical plants, from which are derived many of the preparations of the materia medica. At the United States Patent Office models of many curious medical and surgical instruments may be daily inspected from 9 to 4 o'clock, thus affording to the student an opportunity of studying the mechanical contrivances used in Medicine, Surgery, and Obstetrics.

PRACTICAL ANATOMY.

The Dissecting-Room, newly constructed in the most improved style, is large and thoroughly ventilated. It is amply supplied with gas light, water, and everything that can contribute to the convenience and comfort of the student. The room is open during the day, and in the evening until 11 p. m., under the direction of the Demonstrator of Anatomy, who will always be present in

the evening to give his personal attention to the classes and properly instruct them while conducting their dissections.

GENERAL SKETCH OF THE SEVERAL LECTURE COURSES.

MATERIA MEDICA AND THERAPEUTICS.

PROF. JOHN C. RILEY, ONE OF THE ATTENDING PHYSICIANS TO PROVIDENCE. HOSPITAL

In this department great pains will be taken to render the student familiar with the natural history, the appearance or physical properties, as well as the chemical composition, of the various articles of the materia medica. Medicines often fail to produce their appropriate effects because they are spurious, adulterated, unskilfully prepared, collected at the wrong season, or kept too long, &c. These various sources of error and disappointment will be discussed with care and minuteness, and for this purpose every article lectured upon will be exhibited to the class, and the various ways in which it is adulterated, with the best mode of detection, will be fully explained.

Especial attention will be paid to the physiological effects and the therapeutical adaptation of remedies. Their modus operandi will be discussed, in a general way, at the commencement of the course, and each particular article subsequently noticed with reference to its particular action.

SURGERY

PROF. J. FORD THOMPSON, ONE OF THE ATTENDING SURGEONS TO PROVIDENCE.
HOSPITAL.

The principles and practice of Surgery will be taught from this chair, both by didactic lectures and clinical instruction. Orthopodo Surgery and Diseases of the Genito-Urinary system will be included in this course. Regular clinics will be held during the term at Providence Hospital, where every facility will be afforded to the class for witnessing surgical operations. At the Medical building also operations will be performed upon the codocer, and the use of all important surgical instruments and appliances will be demonstrated in the same manner. A fine collection of colored models, life size, and illustrating surgical anatomy, forms an attractive feature of the surgical course.

THEORY AND PRACTICE OF MEDICINE.

PROF. W. W. JOHNSTON, ONE OF THE APPLICADING PHYSICIANS TO THE CHILDREN'S HOSPITAL.

The course of instruction in this department will, it is hoped, impress upon the memory of the student the main facts of pathology, and supply him with the necessary knowledge to observe the phenomena of discusse The study of diseased tissue will be a constant prelude to that of disturbed function, and the relations of one to the other will be fully developed. In furtherance of this plan, interoscopic teaching will be constantly used to supplement description and diagrammatic representation.

OBSTETRICS AND THE DISEASES OF WOMEN AND CHILDREN.

PROF. A. F. A. KING, ONE OF THE ATTENDING PHYSICIANS TO PROVIDENCE HOSPITAL.

The course in this department will comprise a series of sixty didactic lectures, illustrated by an elaborate collection of more than life-sized diagrams, manikins, models, and wet anatomical preparations. The various obstetried instruments, as well as those employed in the treatment of idertine lise assess will be exhibited to the class, and their rises explained. The professor will endeavor to provide cases of midwifery whenever practical le, but these will be given out only to advanced students or candidates for graduation. During the latter part of the term special aftention will be given to the discuss of women, with a view to render the student familiar with the various modes of manual and instrumental examination, and the surgical and the rape itieal remedies required in the management of utering disease.

CHEMISTRY AND TOXICOLOGY

PROF. EDWARD T FLISTOR

The instruction in this department embraces

1st. A short discussion of the various branches of Physics, as Specific Gravity, Pneumatics, Heat, Light, Electricity, &c., so far as they relate to the science of Chemistry.

2d. The principles of chemical Philosophy, the laws of chemical combination, and of chemical affinity in general

3d. A discussion of the elementary baches, both no talke and non-metallic, the best methods of preparing the various inerganic bodies, their properties and reactions, and the means of detecting their presence.

ith. The so-called "organic hodies" will be considered, as far as time will permit, especially those most useful to the physician, such as organic acids and their salts, alkaloids. &c

Throughout the entire course the application of Chemistry to Medicine and Pharmacy will be constantly brought before the student

Special attention is given to Toxicology - Every person is stodied, so far as the tests for its presence, and appropriate antidotes, are concerned

The principles of the secence are abundantly illustrated by experiments.

ANATOMY, DESCRIPTIVE AND SURGICAL.

PROF. W. B. DRINKARD, ONE OF THE ACTINDING SURGEONS TO THE CHILDREN'S HOSPITAL

These lectures will be so arranged as to give a course of descriptive and surgical anatomy as completely as possible within the limits of the session, in

cluding the nee-scry elements of normal histology, and illustrated by appropriate preparations, diagrams, and models. Evanimations will be conducted weekly throughout the course.

The Demonstrator of Anatomy, in addition to giving his personal attention to the stadent in the dissecting room, will assist the didactic lectures of the chair by such practical demonstrations as occasion may suggest.

PHYSIOLOGY.

Prof. Wm. Lee, one of the visiting physicians to the Columbia Hospital DISPLASARY.

This course of bettings will consist of a practical exposition of physiology. aided, as for as possible, by chemical experiments, diagrams, and the use of the interescope. The more fully to impress upon the namony of the student the import at principles embraced in this part of his curriculum, reviews will be held from time to time in the form of class examinations. The ourse will be continued strictly to Physiology, with a view to cover fully the whole ground occupied by this branch.

| No charge is a betor Clureal Lectures. | | | | |

Payment of the fees is required in all cases, and tickets must be taken out at the commencement of the session.

The requisites for graduating are, that the candidate shall have

attended the Lectures of each Professor two full courses: or one full course in this School, and one full course in some other respectable institution. He shall have studied medicine at least three years under the direction of some practitioner. He must have a good moral character, and he shall have dissected during at least two sessions. He shall have entered his name with the Dean of the Figuilty is a cardidate for graduation, and delivered to him an Inaugural Dissertation upon some medical subject thirty days before the close of the session, and must pass a satisfactory examination.

At the end of each term three prizes are given—a General Examination prize, a Thesis prize, and an Anatomical prize—valued at twenty-five dollars each.

All persons who have attended two full courses of Lectures in this School are entitled to attend succeeding courses free of expense.

Graduates of other accredited medical colleges after three years are required to matriculate only. Prior to the expiration of three years the fee for a general ticket is \$50.

The price of board and all other personal expenses are as reasonable in Washington as in other large enties of the Umon.

Students requiring further information are requested to communicate with the Dean of the Faculty.

THE COLUMBIAN COLLEGE.

The regular course of instruction given in this Department is comprised in seven schools, as follows:

I. School of English: including English Philology, English Literature, Rhetoric, Logic, Elocution, General History, and Anglo Saxon.

II. School of Greek: including the Greek Language and Literature, and the History of Greece.

III. School of Latin: including the Latin Language and Literature, and the History of Rome.

IV. School of Modern Languages: including the French and German Languages and Literatures, with the History of France and Germany.

V. School of Mathematics: including Pure Mathematics. Mechanics, and Astronomy.

VI. School of Natural Science: including Physics, Chemistry, and Natural History.

VII. School of Philosophy: including Mental and Moral Philosophy, Political Philosophy, and the Philosophy of History.

SCHOOL OF ENGLISH

PROFESSOR SILL IE

There are four classes in this school

Freshman Class.—Instruction is given in the grammatical forms of the Entlish language, its structure, and its idiomatic character: also in reading, elecution, and composition:

Text-Book: Fowler's English Laborate

Sophomore Class.—Instruction is given in the fundamental principles of style and invention, mainly in the manufacture of the style cal aspects. Instruction is given in elecution and composition: also, in the general outlines of Englishment Alexander of the style of

Text-Books: Campbell's Rhetoric; Whately's Rhetoric: Smith's Student's Hume; Eliot's History of the United State

Junior Class.—Instruction is given in the principles of pure and applied logic, and application of these principles is a resident and reconstructing ordinary forms of ar, and the select authors in struction is also given as to the origin, divelopment, and present powers of the language; also, in the biography, times, and works of the best English writers.

Text-Books: Bowen's Longe, Thomson's Outlines of the Laws of Thought: Earle's Philology of the English Tongue, Shaw's English Laterature. Declamation and composition are required.

Senior Class - Instruction is given in Anglo Saxon and Farly English, with select readings from the Angle Saxon Gospels, Beowulf, Ormalian, and Chaucer.

Text Books: Shute's Manual of Anglo Saxon. Corson's Hand book of Anglo Saxon and Early English March's Arglo Saxon Grammar.

Essays and original orations are required through the year.

The Anglo-Saxon, being an optional study, is not required for a degree.

SCHOOL OF GREEK

PROFESSOR HUNTINGTON AND TUTOR LANE.

In this School instruction is given in the Greek Language and Literature and in Greek History. The School embraces four classes. Freshman, Sephomore, Junior, and Schoor, with the following text books

1. In the Freshman Class: Xenophon's Anabasis, Homer's Ilind. Good. win's and Kühner's Greek Grammar: Boise's Greek Prose Composition; and Smith's History of Greece

2. In the Sophomore Class - Herodotus or Thurydides , Venopion's Memorabilia: Hadica's or Kaliner's Greek Grammert Bosse's Greek Prose Com-

3. In the Junior Class: Sophocles, Euripides, and Demostle in ..

4. In the Senior Class Plato

Lectures are given to the classes on Greek Literatare.

To the two higher classes are assigned frequent exercises in rendering into Greek, English translations from Greek authors.

Liddell and Scott's Greek Lexicon; Browne's History of Greek Laterature: Finding's or Long's Classical Atlas, and Smith's Greek and Roman Antiquities, are recommended to students in all classes.

SCHOOL OF LATIN

PROFESSOR HUNGINGTON AND TUTOR MONTAGET.

In this School instruction is given in the Latin Lauguage and Literature and in Roman History. The Sci. of his four classes: the Freshman, Sopho more, Junior, and Semor, with the following text books:

1. In the Freshman Class, Oved, Lavy, Harkness' Latin Grammar and Latin Prose Composition; and Liddell's History of Rome.

2. In the Sophomore Class: Cicero de Amicitia et de Senectate Horace: and Harkness' Latin Prose Composition.

3. In the Junior Class: Tacitus and Juvenal.

f. In the Senior Class: Quintilian.

Lectures are given to the classes on Roman Literature

In the two higher classes, exercises in composition are continued by rendering into Latin, English translations of passages from Latin authors.

Madvig's or Zumpt's Latin Grammar, in addition to Harkness'. Andrew's

or White's Eatin Lexicon, Browne's History of Roman Literature, and Find ley's or Long's Classical Atlas, are recommended to students.

SCHOOL OF MODERN LANGUAGES

Professor Janus and Professor Shell

This School is divided into two Department, the Preside, and the German, of which the former is under the direction of Prodessor J. as a said the latter under the direction of Professor Shut-

In the French Department there are three classes the Fresha and the Soph omore, and the Jumor.

A course of grammatical instruction, with ord and writter, exercises, is begun in the Treshman Class. Lext Books. Fre-publics Trench Grammar. Leçons de l'attendere Francaise Classique

In the Sophomor Class attention is given to hadrer in min-to-al analysis, and to exercises in Fr. wh composition and conversation. Lext looks. Grain maire Francais, de Noclet Chapsel, Seeller's Ly was a for translating Lug lish into French. Williams' Exercises in Conservation.

In the Jumor Class portions of classical French, athors are read in connec tion with the foregoing exercises.

Candidates for the degree of A. M. write original French essays during the fourth year of their coorse.

In the German Department there are three classes the Freshman, the Sophomore, and the Januar.

Freshman Class. The study of the language is been in this class. Students are drilled in the grammatical protetyles of the language, and constant exercise is required in rendering Erenish, into German, as well as in translating German into Lind a

Text-Book: Otto's Conversation Grainicer.

Sophomore Class. The study of the Granm, it is contained throughout the year in this class also.

Text-Books. The Grammer, and Goothe's Here, an und Ponothe's

Schiller's Jungtrate von Orlean, and Searchous from Junior Class Goeth

Candidates for the degree of A. M. write original coefficiences essays during the fourth year of their course.

SCHOOL OF MATHEMATICS

PROFESSOR PRISTOF AND TO BE WEST IN

In this School are taught Pure Mathen, it is, Mechania, and Astronomy There are four classes.

1. The Freshman, in which are twight Alacion, and Place and Solid George

Text-Books. Looms' Algebra and Googetry, and Olmey's Lauversily

2. The Sophomore, in which are to set Plan, as 1 Species 1 for occumetry at 6

their application to Seav yate, with the use of Instruments, and Analytical Geometry.

Text Books Louines Trigonometry and Surveying, and Oliney's Analytical Geometry.

 The Januor, in which are twight Differential and Integral Calculus, and their applications.

Text Books : Olney's or Todh aters Cale dis.

4. The Semor, in which are taught Mechanics and Astronomy

Text Books: Olmst. Ts and Smith's Meclaimes, and Loomis' Astronomy.

SCHOOL OF NATURAL SCIENCE.

Phofesson Phispot

This School is divided into four classes.

- 1. The Freshauer, in which are taight the principles of Human Physiology and Structural and Systematic Bergly and Zoology. By pursuing these stadies in the early part of his cours, the student becomes funding with the methods of classification, and learns at the sum time the habit and vide of mediate observation.
- Text for as Dulton's Physiology, Gray's Bothny, and Nicholson's Zoology.

 2. The Sophomore, in which are tradit the various branches of Experimental Physics, viz: Hydrostatics, Hydrodynamics, Pia amatics, Acoustics, Hent, Light, and Electricity.

Text-Books: Ganot's Natural Philosophy, and Sillamen's Natural Philosophy.

3. The Junior, in which are to ght Inorganic and Or, one Chemistry, embracing the Price ples of Chemical Unilosophy the Laws of Chemical Combination, the preparation of Llementary and Compound Bodies, the methods of Analysis, Increase and Organic, the detection of Poisons, and the methods of countercome their effects

Text-Books Barker, Rolco , and Fowne

4. The Senior, in which is a cost Meseralogy and to closey. The instruction begins with centered Min relogy, as an introduction to Geology. In Geology, the Physical Cloresters of the Earth as it now exists are first stoched, there its flistery and Changes, and lastly, the causes that have produced these Changes and their identity with existing causes.

Text-Books D in 8 Mineralegy and Goology.

In this School, stilled as who have passed through the class in Chemistry can pursue, at their option, Qualitative and Quantitative Analysis, for which an extra fee of \$5.0 will be about 1, and assola small charge for materials.

THE SCHOOL OF PHILOSOPHY

Tur President.

The special stables of this School are personal in two Classes, the Junior and the Senior — In the Junior C^{1} — the $\pm t^{2}$ stable of study its is directed to the study of Moral Phinosophy — t=t —thock—sochis Calderwood's Hand Book

of Moral Philosophy, accompanied with lectures on the history of theoretical ethies, from the days of the Grecian philosophers down to the present time. In this historical review special attention is called to the phases of English speculation under the head of Moral Philosophy, with a critical reference to the main points of controversy from age to age among the exponents of different schools

In the Senior Class, the study of Natural Theology and of Mental Philosophy is pursued under the direction of the President, who also during the current year will serve as acting Professor of Political Philosophy, the latter embracing Political Economy, Constitutional Law of the United States, and the elements of International Law. The text books used in the study of Natural Theology are Paley's Natural Theology and Butler's Analogy of Religion and Nature, accompanied with lectures on the more modern aspects of the questions discussed under this load. The text look used for the purposes of recitation on Mental Philosophy is Porter's Intellectual Science, accompanied with lectures on the history of specificative philosophy and of its leading schools in ancient times, during the Midale Ages, and since the Revival of Learning.

In the study of Political Economy, as played in the School Class of this School, the text book used is that of Dr. Wayland, with references to the treatises of Adam Smith, Maltheis, Bastiat, Carey, Mill, and others

Story's Commentaries on the Constitution of the United States and Wool sey's Elements of International Law are used as text books in the study of Political Philosophy.

A covase of lectures is also delivered by the Pres Tent to the Senior Class in this School on History, its sources, methods of stady, chaments of criticism, and its philosophy, with special critical references, ander the last manael head, to the systems of Vico, F. Schlegel, Herder Tichte, Schelling, Herel, Bunsen, Guizot, Balmes, Buckle, Draper, and Locky.

TIME AND TERMS OF ADMISSION

The regular examinations for admission to the College are held on the Monday and Tuesday immediately preceding the opening of the session. Every applicant is required to deliver to the President testimonials of good moral character; and if he comes from another college he must present a certificate of honorable dismission.

Candidates for admission to any class of the College must, unless they are graduates of the Preparatory School, sustain an examination in the following elementary studies: Spelling, English Grammar, Geography, Elements of History, and Arithmetic.

Candidates for admission to any School will be examined in all the studies presupposed by the curriculum of that School.

Candidates for admission to the School of English will be admitted to its lowest class on passing a satisfactory examination in the preliminary studies above indicated

Candidates for admission to the School of Greek in its lowest class, the Freshman, will be examined in Goodwin's or Hadley's Greek Grammar: Goodwin's Greek Reader, or Xenophon's Anabasis, (first three books;) Jones' Greek Prose Composition

Candidates for admission to the School of Latin in its lowest class will be examined in Harkness' Letin Grammar; Cassar's Commenturies. Ciecro's Select Orations; Virgil, Harkness Latin Prose Composition

Carabdates for admission to the School of Mathematics, in its lowest class, the Freshman, will be examined in Algebra, to Quadratic Equations, and in the first three books of Geometry

Real equivalents in quality and amount will be received in place of the books or parts of books prescribed as above for study preparatory to admission into the Schools of Greek, Latin, and Mathematics.

Candidates for admission to any advanced class, in any School will be examined in all the previous studies of the class which they purpose to enter.

Students wishing to pursue a Select Course in any School or Schools will be admitted to the classes for which they may be 1 and qualified; but an examination in preliminary and indispensable studies will be held in all such cases, and every student pursuing such a course is required to embrace in his selections not less than

twelve recitations or lectures per week. The choice of studies embraced in a Select Course must be made immediately upon the commencement of a term, and no student will have leave to make a new choice of studies during any single term.

CERTIFICATES AND DIPLOMAS

The degrees of the College are conferred only on evidence of satisfactory attainments in the studies prescribed for any given degree. The eligibility of candidates for any degree is determined by the quality and the extent of their studies in the several Schools of the College.

I. Certificates of Proficiency are given to students who pass a satisfactory examination on the following studies of the several Schools: In the First, on English Literature. History, and Rhet oric; in the Second, on the Greek of the Freshman and Sophomore Classes; in the Third, on the Latin of the Freshman and Sophomore Classes; in the Fourth, on the French or the German Language; in the Fifth, on the Mathematics of the Freshman and Sophomore Classes; in the Sixth, on the Chemistry of the Junior Class; in the Seventh, on Mental or Monal Philosophy.

II. Students who pass a satisfactory examination on all the obligatory studies embraced in any one of the Schools of the College will receive a Diploma certifying the fact of their graduation in that School

DEGREES

I. The degree of Bachelor of Letters is conferred on students who obtain diplomas in the Schools of English, Greek, Latin, Modern Languages, and Philosophy, and who receive a certificate of proficiency in the School of Mathematics or of Natural Science.

II. The degree of Bachelor of Science is conferred on students who obtain diplomas in the Schools of English, Modern Languages, Mathematics, Natural Science, and Philosophy.

III. The degree of Bachelor of Arts is conferred on students who obtain diplomas in any six Schools, and who receive a certificate of proficiency in the residuary School of the entire course.

IV. The degree of Master of Arts is conferred on students who, after obtaining diplomas in all the Schools of the College, shall sustain a final and satisfactory examination in review of all the studies prescribed for this degree

Certificates and diplomas in any School of the College are awarded only at the close of the College year in each School, and after an examination duly had according to the rules of the institution.

EXAMINATIONS

At the end of each term an examination of all the classes in all the Schools is publicly held in all the studies of that term.

The results of each Term Examination are combined with those of the daily recitations and attendance of the student during the term, in order to ascertain his academic standing at the end of that term.

Each recitation and each examination are graded on a scale of merit from 0 to 100, and a failure to reach the final average grade of 75 in any study is regarded as a failure in that study

At the close of each College year all the classes in all the Schools are publicly examined in review of all the studies of that year.

The results of the Annual Examinations are combined with those of the Term Examinations, in order to ascertain the student's academic standing at the end of each year

At the close of the second year of the regular course, prescribed for all the degrees of the College, the Annual Examination of the Sophomore Classes in the several Schools, besides embracing all the studies of that year, will include such studies of the Freshman year as the head of each School may direct. The results of this examination will determine the eligibility of candidates to receive a Certificate of Proficiency at the end of this year in the School of Greek, Latin, or Mathematics, as the condition of attaining in regular course to one or another of the degrees dependent on such proficiency

At the close of the regular four years' course all candidates for the degree of Master of Arts will be publicly examined by way of review in all the studies of all the Schools prescribed for that degree

A student who fails to pass a satisfactory examination in any study at the end of a College year may present himself for reexamination in that study at the end of the following year, and in default of doing so shall forfeit promotion with his class in that department All examinations which occur at the end of a College year are conducted in writing. Examinations for the degree of Buchelor of Arts and Master of Arts are concluded four weeks anterior to the date of the Annual Commencement, that time may be given to Professors for the inspection of written examination papers, and to students for the preparation of parts to be performed on Commencement Day by the successful candidates for the degrees of Bachelor and Master of Arts, to whom public parts on that day may be assigned by the Faculty.

ANNUAL PRIZES

Besides the honors and degrees conferred in the regular course, prizes are annually offered as the rewards of special excellence in particular branches of study.

The Davis Prizes, for excellence in Elecution, founded by the Hon. Isaac Davis, LL. D., of Mussachusetts, consist of two gold medals, and are annually awarded to the two successful competitors in a public contest held on Commencement Dav. These prizes are awarded by a committee whom the Faculty selects for this purpose, and are publicly delivered at the close of the contest.

The Staughton Prize, for excellence in the Latin Language and Literature, and the Elton Prize, for excellence in the Greek Language and Literature, founded by the Rev. Romeo Elton, D. D., of Exeter, England, consist of two gold medals, annually awarded to the best scholar and writer in each of these languages

The Ruggles Prizes, for excellence in Mathematics, founded by Prof. William Ruggles, LL. D., consist of two gold medals, annually awarded to the best two scholars in the pure and applied Mathematics.

The Young Prize, for excellence in Metaphysics, the gift of the Hon. Edward Young, Ph. D., of Washington, D. C., is a gold medal annually awarded to the best student in Mental Philosophy.

Any student entitled to a diploma in any school will be allowed to contend for the prizes given in that department, provided he shall have pursued the required number of studies during the year, and shall have passed satisfactory examinations in the same

PRIZEMEN FOR THE YEAR 1875-'76.

In the collegiate year of 1875-'76, the following are the names of students who were the successful contestants for the various prizes:

The Elton Prize in Greek was awarded to William B. Frishr, of the District of Columbia.

The Staughton Prize in Latin was awarded to WILLIAM B. FRISHY, of the District of Columbia.

The Young Prize in Mctaphysics was awarded to Lucius M. Cuthbert, of the District of Columbia

The First Ruggles Prize in Mathematics was awarded to William B. Frisht, of the District of Columbia.

The Lindsly Prize for Reading was awarded to Lucius M. Cuthbert, of the District of Columbia.

The First Davis Prize in Elecution was awarded to Lucius M. Cuthbert, of the District of Columbia.

The Second Davis Prize in Elecution was awarded to Frank Fuller, of the District of Columbia.

The gold medal for Excellence in Debate was awarded by the Enosinian Society to Theodore W. Noyes, of the District of Columbia.

ORDERS OF THE COLLEGE YEAR.

TERMS AND VACATIONS

The College year, embracing nine months, is divided into two terms. The first term begins on the second Wednesday in September, and continues to the first Thursday in February. The second term begins on the first Thursday in February, and ends on the day of the Annual Commencement, which is held on the first Wednesday in June.

 Λ vacation of eight days is given at Christmas, beginning on that holiday, and lasting until the next day after New Year's.

The 22d of February is observed as a College holiday.

A recess is given from Good Friday to Easter Monday, inclusive.

ANNUAL COMMENCEMENT

The Annual Commencement of the College is held on the first Wednesday in June.

Public parts are assigned on Commencement Day to such students only as have passed a satisfactory examination for the degrees

of Bachelor or Master of Arts, except, as before indicated, in the case of those who may be contestants for the prize in Elecution.

A Latin Salutatory will be awarded to the graduate in each year whose average standing in all the Schools is the highest; and an English Salutatory to the student who stands second

The Valedictory is awarded with special regard to the qualifications of the student as a Valedictorian, as well as on the ground of scholarship.

Philosophical, Classical, Scientific, Metaphysical, Ethical, Historical, or Literary Orations may be awarded to students who are eminent respectively in the corresponding Departments

All the degrees of the College are publicly conferred on Commencement Day.

Diplomas in the several Schools, and prizes for special excellence in any Department, are publicly delivered on the same day.

PUBLIC WORSHIP.

Prayers, accompanied by the reading of the Scriptures, are of fered daily in the College Chapel. All students are required to attend this service: and those who reside in the College are required also to attend Divine service on Sunday at such claimed as their parents may indicate, in writing, to the President, and during the day are expected to abstain from any conduct or practice in consistent with its proper religious observance.

LIBRARY HOURS

The College Library will be open for the distribution of books, as also for purposes of consultation and inquiry, on such days and under such regulations as the Faculty may direct at the beginning of each year. Measures have recently been taken by the Board of Trustees and Overseers for the improvement of the Library in its contents and its appointments.

The Libraries of Congress and of the various Departments of the Federal Government are also accessible to students for purposes of research in any special line of studies

LITERARY SOCIETIES

There are two Literary Societies formed by the students of the College, the Enosinian and the Philophrenian, which much weekly

at their halls for the purpose of improvement in Debate and Composition

LECTURES

Courses of Lectures in various departments of Science, Art, and Literature are open to the attendance of students, not only in the College, but in connection with various Associations, national and local, devoted to general culture at the Capital of the country, and furnishing peculiar facilities for information and improvement in every branch of liberal learning.

As the endowments of the University shall be enlarged by the munificence of patrons and benefactors, it is proposed to render available, for purposes of higher education, the rich collections of the Smithsonian Institution and Agricultural Department in science and natural history, and those of the United States Patent Office in technology. It is also hoped that the scheme of instruction pursued in the University may ultimately enlist in its service the scientific learning now connected with the United States Coast Survey and the National Observatory, while the Corcoran Gallery of the Fine Arts cannot but serve as a valuable auxiliary to resthet ical culture.

GENERAL ORDERS.

Every student on entering the College is understood by that act to come under a pledge that he will obey the rules and regulations prescribed by the Board of Trustees and Overseers, and by the Faculty acting under the authority of the Board.

A pumphlet copy of the Laws of the College will be furnished to every student on his admission.

A merit roll of conduct is kept, and demerits are given for un excused absences, and for violations of College laws. When any student has received one hundred such marks during any one term, or one hundred and fifty during any one year, he may be required to leave the institution.

A report of the student's standing in all his studies, including a record of all absences from lectures, recitations, or other public exercises of the College, will be rendered quartorly to parents or guardians.

The daily recitations of the College Classes are brought, as far as practicable, into the early portion of the day, closing generally

at 2.30 o'clock P. M., and on Siturday at 11 o'clock A. M. The advantages of an attendance upon the debates of Congress, and upon lectures before various associations, are thus offered to students of the higher classes without detriment to proficiency in their studies. Any parent or guardian who desires a special privilege for his son or ward in this respect must, however, signify it in writing to the President

COLLEGE EXPENSES

CHARGIS FOR STUDENTS RESIDENCE IN COLLEGE

| 1. | Admission Fee. (paid but once, on entrance) | \$10 | 00 |
|-----|---|------|------|
| | Tuition for the year in three or more Schools | | ()() |
| 3. | Tuition for the year in two Schools | 45 | 00 |
| 4. | Tuition for the year in one School | | 00 |
| | Room rent and servants' attendance | 20 | ()() |
| | Fuel, public and private (estimated) | | 00 |
| ě., | Use of Furniture provided by the College | 12 | ()() |
| Ö. | Board for 39 weeks, at \$4 50 per week, (estimated) | 175 | 50 |
| :). | Washing, at 75 c ats per dozen | | |

CHAROLS FOR SIT DENIS NO. LESIDENGEN COLLEGE

| 1. | Admission Fee, (paid but once, on entrance) | \$(14) | 00 |
|------|---|--------|-------|
| -0 | Tuition for the year in three or more Schools | 60 | 00 |
| 3. | Tuition for the year in two Schools | 45 | 00 |
| f. | Tuition for the year in one School | 30 | 00 |
| · Ì. | Room rent and servants attendates | 1100 | (1(1) |
| Б. | Fuel, public and private, (autimated) | 16 | 00 |
| 7. | Use of Furniture | 6 | 00 |

From the foregoing statement it will appear that the necessary annual expenses of a student residing at the College need not exceed the sum of three hundred dollars. By the practice of economy some reduction might be made from this amount

The charge for room rent, servants' attendance, and for fuel, as above estimated, are based on the assumption that two students occupy the same room. Students having the exclusive occupation of a room will be charged one half in addition to the foregoing rates.

It is recommended that students who reside in the College should furnish their own rooms, and thus avoid the annual charge nade for the use of such furniture as is provided by the College.

There is no common table provided by the College for boarding

students, but accommodations in this respect can be had on the College grounds, or in the immediate vicinity of the College, as students may prefer. The general charge for board on the College grounds is \$4.50 per week. Facilities for the formation of boarding clubs, with a view to the reduction of expenses under this head, are open to all students who may wish to co operate for this purpose.

All College bills must be paid at the opening of each term, and until a settlement has been made with the Treasurer of the College no student is entitled to attend any lecture or recitation.

After a student has been admitted to the College no abatement from his bill for board will be made, on the plea of absence, for an absence of less than one month, and no abatement from any other College bill will be made on this ground for an absence of less than one term, except in cases of protracted sickness.

When a student is permanently dismissed from College for any cause, the whole amount advanced for board, washing, and fuel, from the time of dismission, will be refunded to the order of his parent or guardian.

FACILITIES OFFERED TO STUDENTS FOR THE MIN-ISTRY.

The founders and patrons of this College have ever made it a leading object of the institution to furnish special facilities to those who are studying with a purpose to enter the Christian ministry. In pursuance of this object the Board of Trustees and Overseers have authorized the Treasurer of the College to remit the charge for tuition in favor of all such students whose means may be limited, and who shall be duly certified by the church in which they are communicants as having the Christian ministry in view. With out such certificate, however, or other equally satisfactory evidence to the same effect, no reduction on this ground will be made.

THE PREPARATORY SCHOOL.

CORPS OF INSTRUCTORS

OTIS T MASON, A. M., Principal, and Instructor in History and the English Language.

ALPHEUS G. LYNE, Instructor in Greek.

ANDREW P. MONTAGUE, Instructor in Latin

ANTHONY H. JANUS, Instructor in French

HOWARD WINSTON, C. E. Instructor in Mathematics

EDWIN B. HAY, A. B., LL. B., Instructor in Book keeping and Penmanship

This School is placed under the special charge of the Principal, who controls and directs its operations, with the aid of assistant instructors, and with the advice and co-operation of the College Faculty, all of whom supervise the work of the School by participating in the instruction of the highest classes in their several departments. Its full course of study extends through four years, and includes Reading, Writing, Spelling, Grammar, Rhetoric, Geography, History, Botany, Arithmetic, Algebra, Geometry, Book-keeping, French, Latin, and Greek, and exercises in Composition and Declamation.

The Preparatory School is designed to afford a thorough preparation for the College. It furnishes also a High School Course, occupying two years for pupils who have completed their studies in the common English branches, either in the Public Schools, or elsewhere.

SCHEME OF STUDIES IN THE PREPARATORY SCHOOL.

FIRST YEAR: FOURTH CLASS.

FIRST TERM.

Reading.
Spelling
Worcester's Pronouncing Speller.

Declamation, Composition, Pennarchip.

SECOND TERM.

Reading.—Anderson's Historical Reader.

Rhetoric. - Bonnel's Manual.

Arithmetic, -General Review

Latin. - Chase and Stuart's Virgil, with Harkness' Grammar and Prose Composition.

Greek .- Goodwin's Reader and Grammar, with Jones' Exercises in Greek Prose Composition.

French.—Fasquelle's New French Course. Selections from French Authors, and Oral Instruction in French History.

Geometry. - Loomis

Composition, Declamation. Penmanship

Books for reference or use in all the classes. Worcester's Inctionary, Worcester's Pronouncing Speller, Webster's Dictionary Series, and Baird's Classical Manual.

TERMS AND VACATIONS.

The Scholastic Year begins on the second Wednesday in September, and ends on the Tuesday before the third Wednesday in June. The year is divided into two terms. The first term ends on the Friday preceding the third Monday in February. The sec ond term begins on the third Monday in February.

There is a vacation of eight days at Christmas, beginning on that holiday and lasting till the next day after New Years. The 22d of February is observed as a holiday. A recess is given from Good Friday to Easter Monday, inclusive.

The School Hours are from 8.45 o'clock A. M. to 2.30 P. M., with an intermission of half an hour at 1 o'clock P. M.

DISCIPLINE.

The School professes to be conducted on Christian principles.

both in its discipline and in its instruction; but no instruction is given and no influence exerted in favor of any peculiar denominational tenets.

In addition to daily recitations, an examination is held at the end of each term on all the studies of that term.

The graded scale of merit used in the School ranges from 0 to 10, and each student must reach the grade of 7 in order to be advanced with his class.

The progress of the scholar is stimulated by daily records, by monthly and term reports to parents, by promotion in his class, and by prizes.

The boarding scholars lodge in the house of the Principal, and are treated as members of the family. They are responsible to him for their conduct at all times. In addition to regular school duties, they are required to attend study hours in the evening, under the oversight of the Principal. They are also required to attend the church of their parents' selection, and to spend a portion of every Sunday in Biblical study, unless excused by the written request of their parents.

THE SESSION OF 1876-77. 37

The Fifty-fifth Course of Lectures will begin on Monday, October 2, 1876, and continue until the 1st of March, 1877.

On the 2d of October a general introductory to the course will be delivered, after which the regular lectures will commence, beginning at 5:30 P. M., daily.

The plan of instruction adopted by this Institution comprises a complete course of scholastic lectures on the seven essential branches of medical science, viz.: Anatomy, Physiology, Materia Medica, Chemistry, Surgery, Obstetries, and the Theory and Practice of Medicine, by which the student becomes thoroughly versed in the principles of his profession; and, conjoined with this, ample opportunities will be afforded for bedside instruction, by which the general principles taught in the lecture-room can be verified, illustrated, and practically applied, under the immediate observation of the student. In this latter particular no pains will he spared to render him perfectly familiar with the various modes of examining patients, analyzing symptoms, and arriving at a correet diagnosis and prognosis of any case that may be presented. In like manner he will learn, from the hands of those ripe in experience, the art of prescribing medicines and of observing their effects, the mode of performing surgical operations, &c. Thus every facility will be provided, so far as education is concerned, necessary to render him at last a competent practitioner of medi-In addition to full sets of diagrams to illustrate the subjects considered by the several Chairs, the College has recently added for that purpose a Sciopticon or Lantern, which enables the Lecturer to give the class faithful and exact (photographic) views of both normal and pathological structures.

Clinical Instruction.

The opportunities for clinical instruction in the City of Washington have of late years increased in proportion to its augmented population and growing business activity, offering a strong contrast, in this respect, to the advantages formerly offered to the student.

PROVIDENCE HOSPITAL, situated at a commanding elevation on Capitol Hill, (corner of 2d and C streets east,) and easily accessible by the street railroads, affords abundant material for clinical instruction. Clinical lectures are delivered in both its medical and surgical wards during the winter term, at selected hours, not conflicting with the evening college lectures, by the attending Staff of the Institution, of which Professors J. Ford Thompson and A. F. A. KING, constitute a part. The Hospital contains upwards of three hundred beds. Of the cases of wounds resulting from accident or violence that occur throughout the entire city a large majority are sent to its wards for treatment, so that surgical injuries and operations can be seen in the greatest variety. The medical wards are also usually well filled during the winter months with cases of disease of great practical interest and pathological variety. The Government having made provision for the reception and treatment of disabled soldiers and sailors, a sufficient number of these are constantly admitted directly from foreign ports, and bearing with them the results of disease contracted in distant climates. to present illustrative instances of pathological conditions seldom met with in the ordinary run of general practice. Opportunity, therefore, is afforded for the students to become not only a competent, but an accomplished practitioner.

Tickets to the Clinics at Providence Hospital will be issued, free of charge, to any medical student on the exhibition of his ticket of matriculation.

At the COLUMBIA HOSPITAL for women, clinical lectures are given, during the winter session, to all students, free of charge.

Children's Hospital.—Clinics will be given at this Institution during the year by the attending Physicians and Surgeons, among whom are numbered Profs. W. W. Johnston and W. B. Drinkard,

to which students will be admitted free of charge. The Dispensary service will be open daily from 1 to 3 P. M.

Many hundred cases are treated annually in the wards and outdoor department, representing a great number and variety of diseases. Under the direction of the attending Physicians and Surgeons, the opportunity is afforded of gaining a practical acquaintance with all the maladies to which children are liable.

Libraries, Army Medical Museum, &c.

The location of the University at the seat of the National Capital affords several striking advantages to the medical student. He has free access to the Libraries of Congress, of the Army Medical Museum, of the Smithsonian Institution, and of the Patent Office, all of which contain rare and costly works in every department of science and literature. The Army Medical Museum, situated on 10th street, between E and F, is also open for inspection daily from 9 to 3 o'clock. With its unrivaled collection of pathological specimens, illustrating the results of disease in every form, and an almost unlimited number of other preparations, showing the effects of gunshot wounds and surgical injuries of every kind, this Museum presents a field for study equal, and perhaps superior, to any institution of the kind either in this country or Europe.

Apart from these considerations, students from a distance have the opportunity of spending a winter profitably at the seai of the National Government during the session of Congress. The College lectures beginning at 5:.00 in the evening, ample time is afforded during the term for visiting the public buildings, works of art, and other places of interest to a stranger. Prominent among these may be mentioned the Government Botanical Gardens, and the Grounds of the Agricultural Department, where the student of botany may find a rare collection of medicinal plants, from which are derived many of the preparations of the materia medica. At the United States Patent Office models of many curious medical and surgical instruments may be daily inspected from 9 to 3 o'clock, thus affording to the student an opportunity of studying the mechanical contrivances used in Medicine, Surgery, and Obstetrics that is not to be obtained in any other city.

Practical Anatomy.

The Dissecting Room, erected in the most highly-improved style, is large, thoroughly ventilated, and attractive. It is amply supplied with gas-light, water, and everything that can contribute to the convenience and comfort of the student. The room is open both during the day and in the evening until 11 P. M., under the direction of the Demonstrator of Anatomy, who will be always present in the evening to give his personal attention to the classes and properly instruct them while conducting their dissections.

The rooms for practical manipulation in minor surgery and surgical appliances, and for practice on the manikin, under the charge of Z. T. SOWERS, M. D., will be open at certain hours, to be hereafter specified.

General Sketch of the Several Vecture Courses.

A DESCRIPTION ASSESSMENT

MATERIA MEDICA AND THERAPEUTICS.

PROF. JOHN C. RILRY, ONE OF THE CONSULTING STAFF TO PROVIDENCE HOSPITAL.

In this department great pains will be taken to render the student perfectly familiar with the natural history, the appearance or physical properties, as well as the chemical composition of the various articles of the materia medica. Medicines often fail to produce their appropriate effects, because they are spurious, adulterated, unskillfully prepared, collected at the wrong season, or kept too long. &c. These various sources of error and disappointment will be discussed with great care and minuteness, and for this purpose every article lectured upon will be exhibited to the class, and the various ways in which they are adulterated, with the best mode of detection, will be fully explained.

Especial attention will be paid to the physiological effects and the therapeutical adaptation of remedies. Their modus operandi will be fully discussed, in a general way, at the commencement of the course, and each particular article subsequently noticed with reference to its particular action.

SURGERY.

PROF. J. FORD THOMPSON, ONE OF THE ATTENDING SURGEONS TO PROVIDENCE HOSPITAL.

The principles and practice of Surgery will be taught from this Chair, both by didactic lectures and clinical instruction. Orthopedic Surgery and Diseases of the Genito-Urinary system will be included in this course. Regular clinics will be held during the term at Providence Hospital, where every facility will be afforded to the class for witnessing surgical operations. At the College also operations will be performed upon the cadacer, and the use of all important surgical instruments and appliances will be demonstrated in the same manner. A fine collection of colored models, life-size, and illustrating surgical anatomy, form an attractive feature of the surgical course.

THEORY AND PRACTICE OF MEDICINE.

PROF. W. W. JOHNSTON, ONE OF THE ATTENDING PHYSICIANS TO THE CHILDREN'S HOSPITAL.

The course of instruction in this department will, it is hoped, impress upon the memory of the student the facts and principles of pathology, and supply him with the knowledge necessary for the recognition and treatment of disease.

The study of diseased tissue will always be made a prelude to that of disturbed function, and the relations of the one to the other will be fully developed. In furtherance of this plan, and in addition to the frequent use of diagrams and morbid specimens, microscopic teaching will be constantly employed to supplement the descriptive details of the lectures.

OBSTETRICS AND THE DISEASES OF WOMEN AND CHILDREN.

PROF. A. F. A. KING, ONE OF THE ATTENDING PHISICIANS TO PROVIDENCE HOSPITAL.

This course will comprise a series of lectures on the science and practice of midwifery, together with additional lectures on Gynecology. The lectures on Obstetrics will be illustrated by an elaborate collection of life-sized diagrams, natural preparations, and papier mache models, exhibiting the anatomy and physiology of reproduction in all its stages. The mechanism and practical management of natural and preternatural labors will be demonstrated on appropriate manikins, and obstetrical instruments of all kinds will be exhibited, and their uses fully explained.

The department of Gynecology, which has of late attained so great a prominence in medical practice, will be thoroughly taught, both as regards theory and practice; and all instrumental and other appliances required in treating the diseases of females will be presented. A complete assortment of instruments and a new collection of colored diagrams will form an attractive feature in this department.

CHEMISTRY AND TOXICOLOGY.

PROF. EDWARD T. FRISTOR.

The instruction of this department embraces --

1st. A short discussion of the various branches of Physics, as Specific Gravity, Pheumatics, Heat, Light, Electricity, &c., so far as they relate to the science of Chemistry.

2d. The principles of chemical philosophy, the laws of chemical combinations, and of chemical affinity in general.

and it has been

3d A discussion of the elementary bodies, both metallic and non-metallic, the best methods of preparing the various inorganic bodies, their properties and reactions, and the means of detecting their presence.

tth. The so-called "organic bodies" will be considered as far as time will permit, especially those most useful to the physician, such as organic acids and their salts, the alkaloids, &c.

Throughout the entire course the application of Chemistry to Medicine and Pharmacy will be constantly brought before the Student.

Special attention is given to Toxicology. Every poison is studied, so far as the tests for its presence and appropriate anti-dotes are concerned.

The principles of the science are abundantly illustrated by experiments.

ANATOMY, DESCRIPTIVE AND SURGICAL.

PROF. W. B. DRINKARD, ONE OF THE ATTENDING SURGEONS TO THE CHILDREN'S HOSPITAL.

These lectures will be so arranged as to give a course of descriptive and surgical anatomy as complete as may be possible within the limits of the session, including the necessary elements of normal histology, and illustrated by appropriate preparations, diagrams, and models. Examinations will be conducted weekly throughout the course as heretofore.

The Demonstrator of Anatomy, in addition to giving his personal attention to the student in the dissecting-room, will assist the didactic lectures of the chair by such practical demonstrations as occasion may suggest.

PHYSIOLOGY.

PROP. WM. LEE.

This course of lectures will consist of a full, clear, and practical exposition of Physiology, aided as far as possible by chemical experiments, diagrams, and the use of the microscope. The more fully to impress upon the memory of the student the important principles embraced in this valuable part of his curriculum, reviews will be held from time to time in the form of class examinations. The course will be confined strictly to Physiology, with a view to cover fully the whole ground occupied by this branch.

faculty Prizes.

At the end of the term three prizes will be given—a General Examination prize, a Thesis prize, and an Anatomical prize—valued at twenty-five dollars each.

THE GENERAL EXAMINATION PRIZE will be given to the candidate for graduation who shall pass the best general examination. Those proposing to contest for this prize, will, in addition to the ordinary examination, be subjected to a special examination in writing.

THE THESIS PRIZE will be awarded to the author of the best inaugural thesis; the competing theses being invariably handed to the Dean on or before the first day of February, furnished each with a motto, and accompanied with a sealed envelope containing the name of the author corresponding to the motto.

THE ANATOMICAL PRIZE will be given to the student who by his own unaided workmanship shell, in a satisfactory manner, best prepare for purposes of permanent preservation an illustrative anatomical specimen, and present the same to the Dean on or before the first day of March. The anatomical prize may be competed for by all the members of the class.

At the commencement in 1876.

THE PRIZE FOR INAUGURAL ESSAY was awarded R. W. SHU-FELDT, Jr., of the District of Columbia. on "Thermometric Observations on Children."

THE SECOND THESIS which the Faculty especially commended was entitled "The Meteorology of Disease," by C. J. Nourse, of the District of Columbia.

HONORABLE MENTION was made of the following theses: "On "Pyæmia," by C. H. J. LINSKEY, of Virginia: on "The Germ Theory of Disease," by C. L. Dana, of Vermont: on "Ervthema Agnostum," by E. B. RANKIN, of the District of Columbia; and on "De Lacte Virorum," by T. H. Bean, of Pennsylvania.

THE FACULTY have great pleasure in stating that all the inaugural theses exhibited a marked improvement in the care exercised in their preparation, and in their intrinsic merit.

THE ANATOMICAL PRIZE was awarded C. J. Nourse, of the District of Columbia.

Fees, Regulations, &c.

| The entire expense for a Full course of Lectures l | by all the | Professor | s is \$135 |
|--|------------|-----------|------------|
| Single Tickets | | | - 20 |
| Practical Anatomy, by the Demonstrator | | | |
| Watriculating Fee, payable only once | | | - 5 |
| Graduating expenses | | | _ 30 |

No charge made for Clinical Lectures.

Payment of the fees is required in all cases, and tickets must be taken out at the commencement of the session.

The requisites for graduating are, that the candidate shall have attended the Lectures of each Professor two full courses; or one full course in this school and one full course in some other respectable Institution, in proof of which he must exhibit his tickets, or other satisfactory evidence of such attendance to the Dean of the Faculty. He must be of good moral character, and at least 21 years of age, and shall present evidence of having studied medicine under the direction of some regular practitioner for a period of not less than three years. He must have dissected at least two sessions, and have attended one course of Clinical Instruction. He shall have entered his name with the Dean of the Faculty as a candidate for graduation, and delivered to him an inaugural dissertation upon some medical subject, correctly written in his own handwriting, thirty days before the close of the session, and passed a satisfactory examination.

Since a knowledge of the elementary branches of medicine should precede a study of the practical branches, and in the hope of inducing students to prolong and systematize their studies, the Faculty offer to students the option of three courses of lectures, as follows: Students who have attended two full courses of lectures on Anatomy. Chemistry. Materia Medica, and Physiology, may be examined upon any of these subjects at the end of their second course. During their third course such students may devote themselves to the lectures upon the Theory and Practice of

Medicine, Surgery, Obstetrics, and Diseases of Women and Children, upon which subjects only they shall be examined at the final examination for the degree of M. D., their standing, however, to be determined by the results of both examinations.*

All persons who have attended two full courses of Lectures in this School are entitled to attend succeeding courses free of expense.

Graduates of other accredited Medical Colleges after three years are required to matriculate only. Prior to the expiration of three years, the fee for a general ticket is \$50.

The degrees are conferred by the authority of the Columbian University, incorporated by an act of the Congress of the United States of America.

The prices of board and all other personal expenses are as reasonable in Washington as in other large cities of the Union.

Students requiring further information are requested to communicate with the Dean of the Faculty.

JNO. C. RILEY, M. D., 1407 New York Avenue.

*This course has been adopted in accordance with the recommendation of the "Association of the Representatives of American Medical Colleges," at its meeting held in Philadelphia, June 2 and 3, 1876.

AUDITORS' CERTIFICATE.

Washington, D. C., June 9, 1877.

To the Corporation of the Columbian University:

Gentlemen: In obedience to the resolutions of the Corporation adopted June 29, 1875, amending the 15th By-Law, the Auditing Committee of the Board of Trustees have inspected the bonds, mortgages, notes, and securities held by the Treasurer of the Corporation, and find the same to be in his possession, and in tenor and amount to correspond strictly with the schedules thereof prepared by the Treasurer as part of his annual report.

Your Committee, having carefully examined the annual report of the Treasurer for twelve months ending May 31, 1877, find the same to be correct, and to contain full and correct information of all property of the Corporation, real and personal, the condition of the various funds and investments, and of the receipts, expenditures, and formation of the receipts.

itures, and financial operations of the past year.

The schedule of the real estate is made to represent its fair cash value, and the appraisements of the public officers have been adopted by us wherever the property is assessed for taxation; therefore the estimated value does not differ from the appraised values. The total value of the real estate was reported in May, 1876, at \$410,542.70, and in May, 1877, is reported at \$357,195.70. The difference is owing to reduced tax valuations.

The cash in treasury on 31st May, 1877, amounted to \$6,716.12, of which \$3,201.02 belonged to the Corcoran Endowment Fund, and is applicable only to investments.

Respectfully submitted.

HENRY BEARD,
A. ROTHWELL,
J. ORMOND WILSON,
Auditing Committee.
